Sequence 79, Application US/09410362F
GENERAL INFORMATION:
APPLICANT: CRAIK, CHARLES S.
APPLICANT: TAKEUCHI, TOSHIHIKO
APPLICANT: SCHUMAN, MARC
TITLE OF INVENTION: WARRANE TYPE SERINE PROTEASE 1 (MT-SP1) AND USES THEREOF
FILE REFERENCE: 28644-001.201
CURRENT APPLICATION NUMBER: US/09/410,362F
CURRENT FILING DATE: 1999-09-30
NUMBER OF SEQ ID NOS: 83
SOFTWARE: PATENTIN Version 3.3
SOFTWARE: PATENTIN Version 3.3
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       GENERAL INFORMATION:
